

A large, high-quality photograph of a modern, curved door handle in a light grey or white finish. The handle is shown from a side-on perspective, highlighting its smooth, ergonomic design. The background is a soft, out-of-focus gradient, making the handle the central focus of the image.

WEST architectural hardware : timeless serenity

If you visit ancient shrines in Japan, you will sometime notice that white sand symbolically formed as twin conical shape. This is known as "*morizuna*" and is believed to signify a landmark for the descent of God while the white sand signifies the purification of the place. In other words, "*morizuna*" expresses spirit of hospitality.

Wishing to inherit this spirit of hospitality, WEST has produce various range of products based on the conical shape. No matter how the era and the environment might change, we will continue to produce products that will be able to make people live in a harmony with our faith and confidence.

This is our philosophy of the WEST brand.

Agaho

Form generated through the exhaustive pursuit of function.

Simple but not minimal. Unique but harmonious. Functional, and yet beautiful.

The design of Agaho originates in the approach toward such conflicting themes. Bringing out the innate beauty of the material. Forms that describe soft lines even though they look sharp, and finish that feel warm to the touch. Everything has been created with a thorough pursuit of function in order to express the spirit of hospitality that is present in the history of the name of Agaho. This is WEST's flagship series.

Agaho S-line

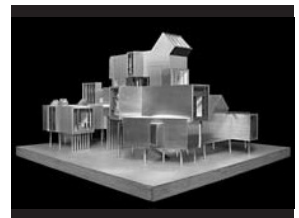

An architectural hardware series created to be coordinated.

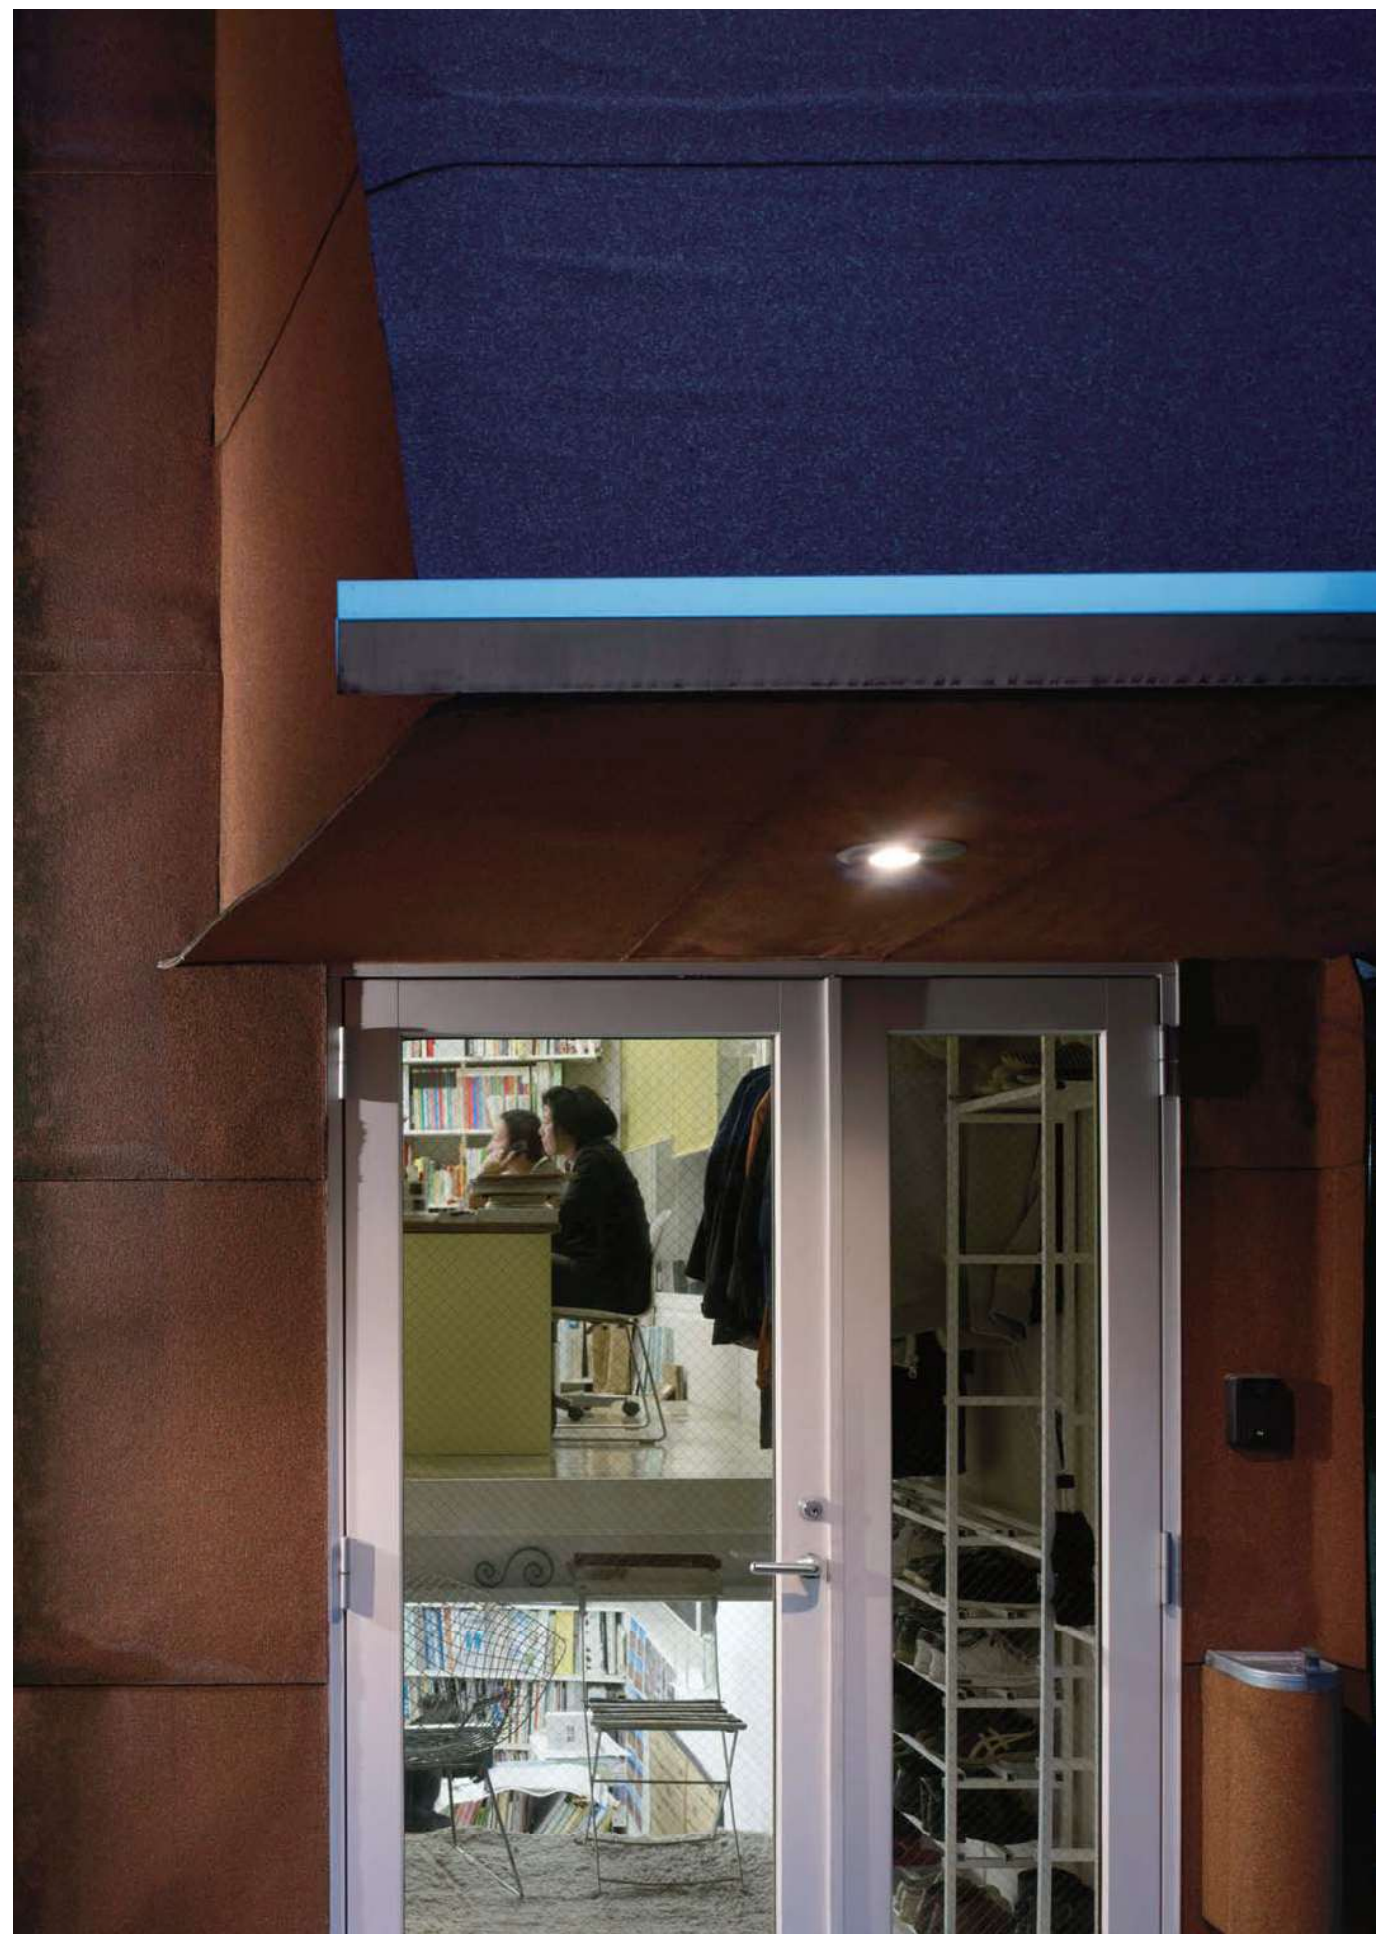

Having selected a lever handle, other hardware items such as cabinet knobs or towel rails may be coordinated in a unified design. Agaho S-line has been created using this concept, and some basic lever handles designs are available. The uniqueness of Agaho S-line is that the necessary items may be freely grouped as a simple design which inherits the original concept of Agaho. This series provides unusual degree of satisfaction in selecting architectural hardware.

F.O.B. Association

FOBA is a Kyoto-based practice founded in 1995 by Katsu Umebayashi (b.1963). Ranging from furniture to landscape projects, the majority of their work comprises inventive residential design. FOBA's style is sculptural in its forms and complex in its spaces, but always emerges from close reading of the local context and a deep understanding of Japan's cultural history.

Atelier Bow-wow

Atelier Bow-Wow, the pair of Yoshiharu Tsukamoto (b.1965) and Momoyo Kaijima (b.1969), was founded in 1992. They began as a combined research and design practice, studying the modern vernacular of Tokyo, their home city. A series of humble yet innovative houses designs has led to larger projects and international fame, but the architects retain their original inquisitive and humorous approach.

House & Atelier Bow-Wow

Felix Claus

Born in the Netherlands, 1956. Graduated from the Delft Institute of Technology. Founding director of Claus en Kaan Architecten. Guest professor at the Swiss Federal Institute of Technology, Zurich. Grand Prix Rhénan d'Architecture (1997), Lensvelt De Architect Interior Prize (2005), Amsterdam Architecture Award (2009).

House in Jingumae

Jun Igarashi

Born in Hokkaido, 1970

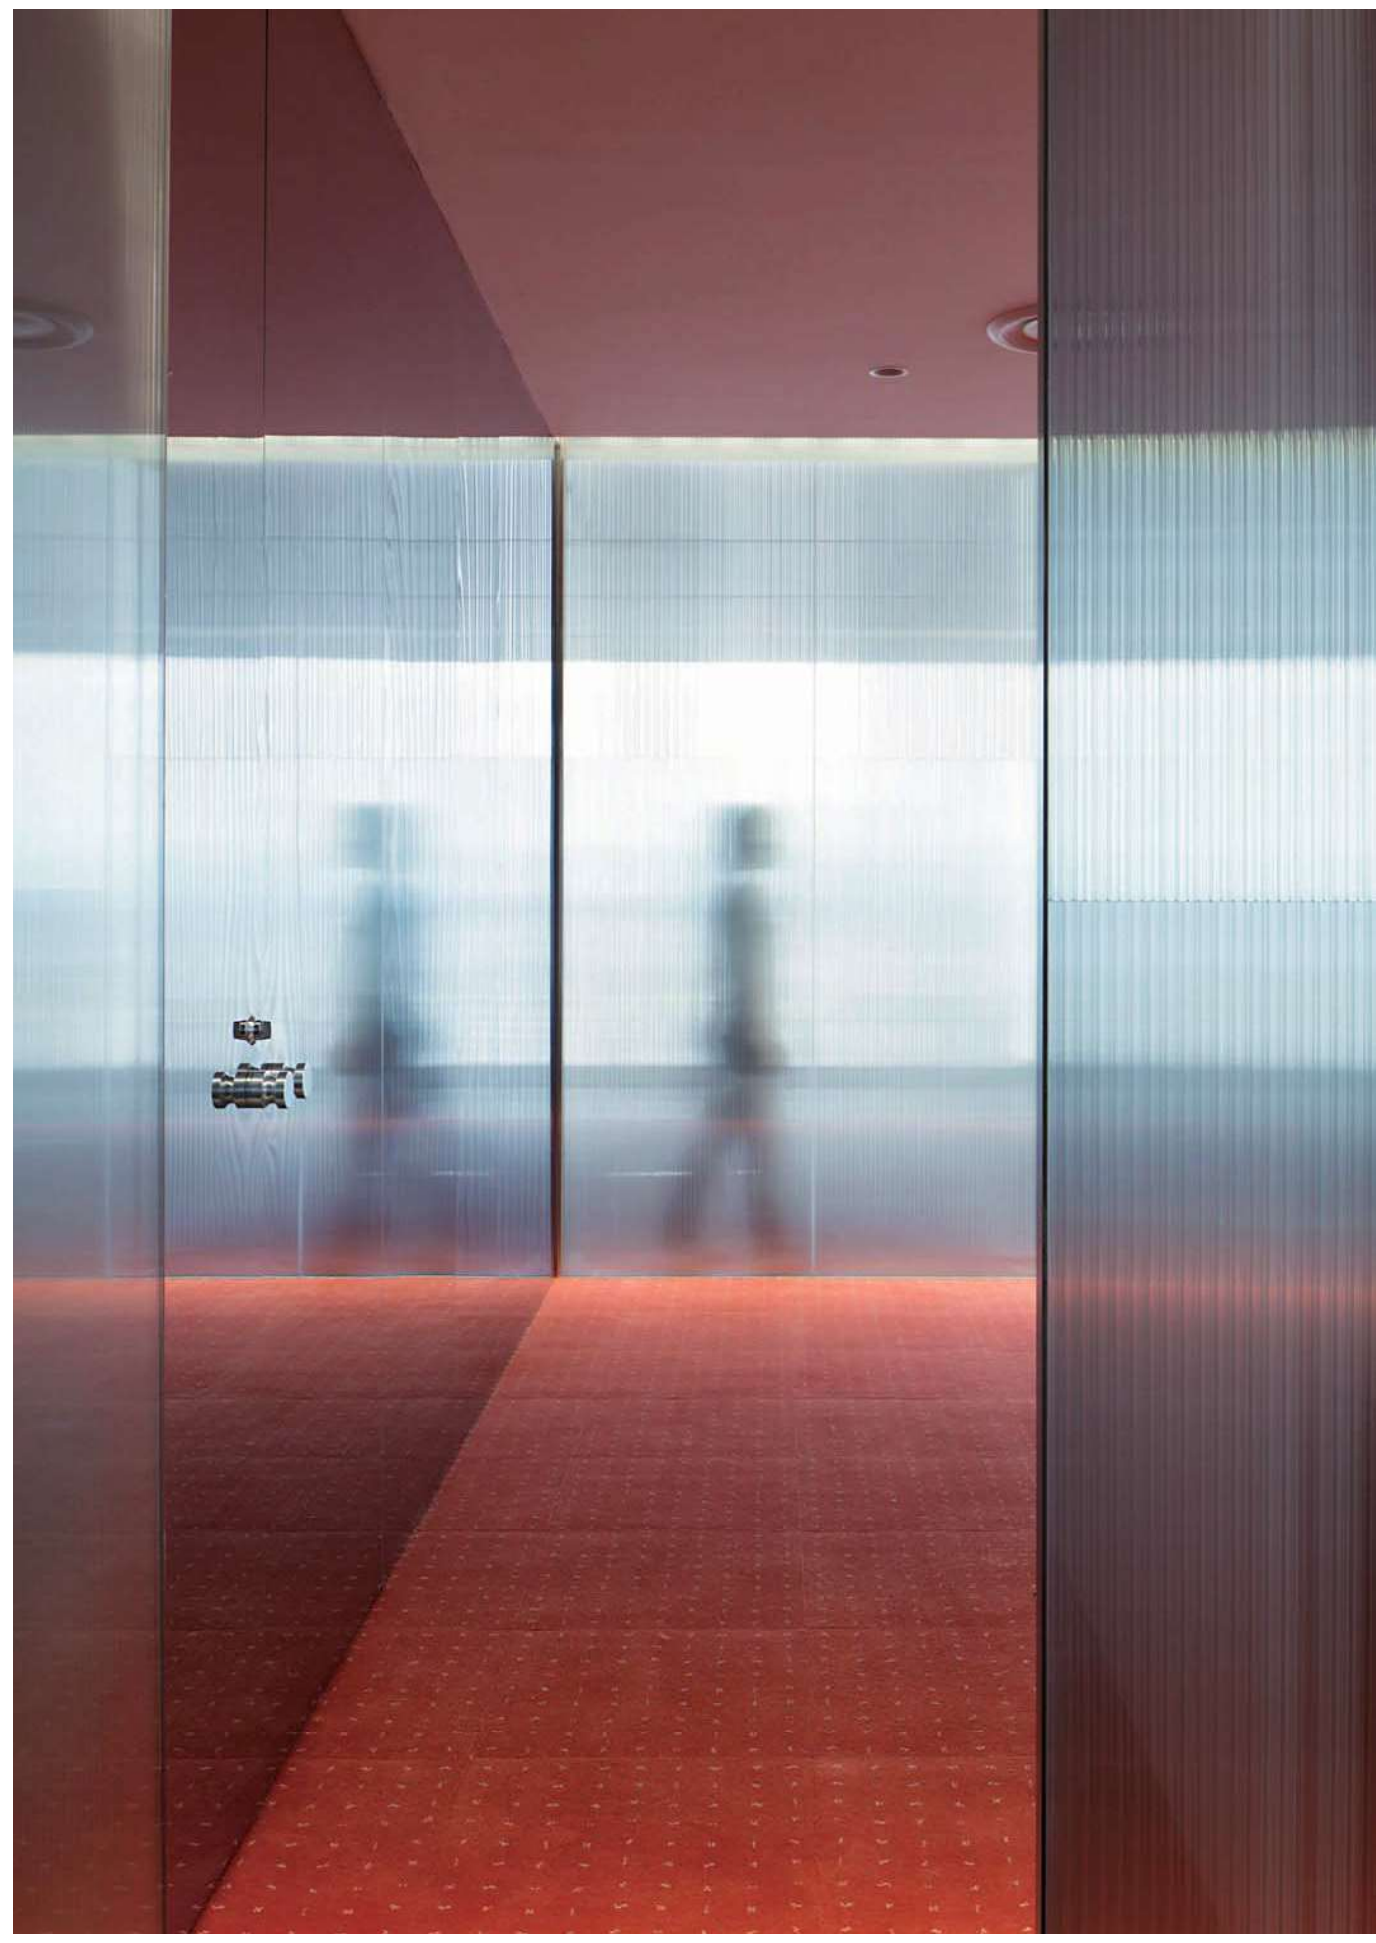

Established Jun Igarashi Architects Inc., 1997
Instructor of Tohoku University, Nagoya Institute of
Technology, and Hokkaido Institute of Technology, 2011
Awards:

Architectural Institute of Japan Hokkaido Architectural
Encouragement Prize (1996), The 19th Yoshioka Prize
(2003), The Grand Prix of Osaka contemporary theater
festival's temporary playhouse competition (2004),

About Us

Company Name

WEST inx Ltd.

Headquarters

3-18-3 Shimeno, Neyagawa-city, Osaka
572-0077 Japan

Established

Oct. 1933

President

Yasuo Nishi

ISO

ISO9001 certified in 1998

WEST has its origins in a factory named "Nishi Seisakusho"(Nishi's factory) founded in 1933 by Mr.Asajiro Nishi. He started with manufacturing of locks and ironmongery hardwares mainly for vessels at Mitejima, near Osaka sea port. About a few years later, the product range had shifted to the category of house building hardware due to the large demands of rapid economic growth.

In 1965, the factory was moved to Neyagawa City where has been a main artery between Kyoto and Osaka since ancient times. At that time, major locking system of sliding door was still screw-in type. Our development of the CL lock, which enables users to lock in a single action, was an epoch-making and brought a big boom in the hardware industry. Following that, we released the Automatic Sliding Door Closer as well as the Push-Pull Lever handle lock. As a result of these developments, WEST started to be known as a manufacturer that creates totally new, innovative and user-friendly products.

Throughout the 1970s and 80s, with highly increasing of housing demand, our product range was greatly widened in accordance with the needs of the market. To meet the market tough demand of quality, cost and lead time, we have been supplying only the best products up until today.

The end of the 1980s was at the peak of the growing Japanese economy in the era of gaudy and gorgeous things were preferred. On the other hand, however, WEST has dared to start a new project, because it was necessary to create a new product range with universality and true values in order to further enrich the spaces of daily life. We came to believe that the new product range must be useful and usable in a long term while attracting a strong attachment from its users. As a result, we have been through many continuous try and error, the first products in the Agaho series were created in 1992. The products that have followed the first Agaho items also embody fundamental ideas and most of them have received Good Design Awards (the Japanese comprehensive design evaluation and commendation) in 1992,2003 and 2008. Not only winning the awards in Japan, those products have received the Gold Prize at the iF Design award in Germany, 2008.

Our present corporate trademark was created a modified letter "W". This shape was inspired by the tip of a Bit Key and shows the WEST identity. We are proud of manufacturing locks and cylinders not only for the domestic market but also for the international market. The most important requirement for manufacturing lock is reliability. Therefore, we believe that our WEST trademark is a guarantee of trust.

In 2010, "Nishi Seisakusho" (the manufacturing headquarters of WEST group) changed its company name to WEST inx Ltd. The word "inx" indicates the meaning of two words starting with "in" -"innovative" and "inspiring"

-that express our company ideals, and "x" shows that the two words are joined in mutual effect. This name originates in the desire of our company to continue creating unique innovative products, and also to have a presence that may help architects and designers to create inspiring living spaces. Moreover, the name implies our stance of cutting through the coming era and our will to revolutionize ourselves in order to match rapid changes in society.

Material and Finish

Aluminium

Material

Aluminium is the world's most used metal after steel, mainly extracted from bauxite, and its supply is comparatively stable. In particular, aluminium is highly recyclable and the energy required to produce a recycled ingot from scrap is only about 3% of that required to produce primary aluminium. Because it is comparatively lightweight, it can be said that aluminium is also environmentally friendly in transport and delivery.

Finish

The surface is anodized after it is molded and polished, and a naturally silver oxidized layer is generated. Anodized aluminium has a unique soft gloss, feeling, warmth, and gentleness, which is very precious. Moreover, users do not need to be concerned with fingerprints on the surface, with the advantage of minimizing daily cleaning.

Special color coated products is also available on request.

Brass

Material

Brass is an alloy of copper and zinc that has an appearance similar to gold. It is a material familiar from ancient times as an interior product with elegant characteristics.

Finish

There are color choices of gold and silver to enhance any space.

Gold Polish (GB)

This is coated with clear lacquer, which maintains the attractiveness of polished brass. Because it also prevents the patina peculiar to brass, daily maintenance is easier.

Silver Polish (SC)

This is a chrome-plate finish that fits simple space, making the most of the dignified feeling of brass.

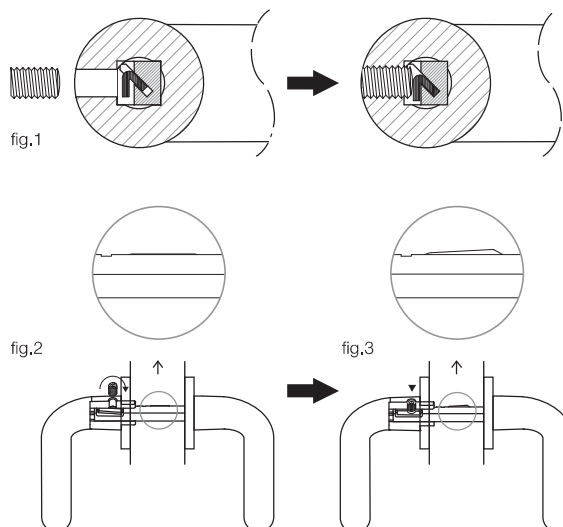

Technical Information

Lever Handle and Door Knob

Advanced Spindle Structure

A stainless steel plate is inserted into a slot of a square spindle. After setting the lever or knob to the spindle and fixing the grub screw, the plate is pushed in (figs. 1 and 2). At the same moment, the plate slides up from the edge of the spindle (fig. 3) and presses the lock-follower from inside. Extra movement between the spindle and the lock-follower can be avoided in this way, and the structure brings the smooth operation of levers and knobs.

The spindle is 8 mm square and comes with operable pairs of levers and knobs for the standard door thickness as stated below.

Available Range of the Door Thickness

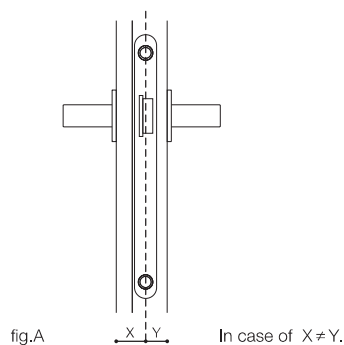

Agaho Lever Handle: 33 - 60 mm (146, 148, 149 and 185)

Agaho Door Knob: 33 - 60 mm (154, 192, 193 and 194)

Agaho S-line Lever Handle: 35 - 50 mm (209 - 238)

Please contact us beforehand in cases where the door thickness does not match the above dimensions. Also in cases where the lock case is not in the center of the door (fig.A), inform us of the distance off-center.

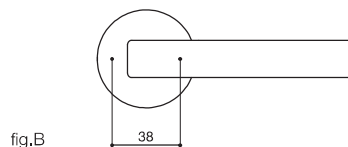

When ordering, specifying the door thickness is always required even if the thickness is in the above available range.

Rose and Escutcheon

Bolt-through concealed fixing with two screws at 38 mm distance (fig. B). Round Rose and Square Rose are interchangeable in Agaho S-line lever handles 209 to 238. Non-standard combination is available on request. Cylinder escutcheons for Euro Profile (PZ) and keyhole escutcheons for Standard Profile are available in both round and square shape.

Bathroom Set

In case of emergency, it can be unlocked with a coin from the outside. When using 952 and 952S, occupancy can be ascertained by the red indicator.

The bathroom set has an 8 mm square spindle and can be used with a lock case that have minimum \varnothing 6.5 mm through holes at 38 mm distance.

Window Handle

For Tilt & Turn windows

The handles stop in 4 positions at 90-degree intervals. Optionally, handles for night ventilation opening set that stop at 45-degree intervals are also available.

Dimensions related to installation are as follows.

Fixing Centre: 43 mm

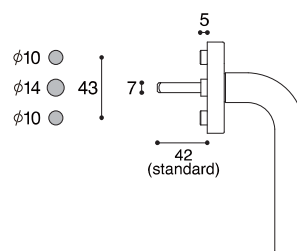

Support Lug: \varnothing 10 mm

5 mm in length

Spindle Size: 7 mm square

Spindle Projection Length: 42 mm (standard)

* Please contact us when the spindle in different length will be required.

Notes

- Hard materials such as rings might damage the surface of our products. This does not impair the functioning. It simply shows the passage of time.
- Please follow the fitting instructions provided with our products in order to carry out proper installation. Please contact us when additional information is needed.
- Technical details or information may change without notice. Please contact us when you need updates.
- Improper usage, incorrect handling, or faulty installation may cause injury or damage the product.

Examples of improper usage / prohibited acts

- * Stepping or hanging on the product.
- * Using a handle or towel rail as a hook.
Do not hang anything heavier than specified in the fitting instructions.
- * Slamming the door open so that the handle strikes a wall.
- * Using a product as a children's plaything.

If there are any questions, please contact us.

Order Guide

How to read the article numbers

Lever Handle and Door Knob

The article numbers for lever handles and door knobs consist of the combination of Model Number and Sub Code. Especially for 217, please also confirm which is required Left-hand or Right-hand lever.

EX: 217 Lever Handle (R) + 950 Escutcheon

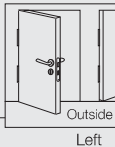

217-BR

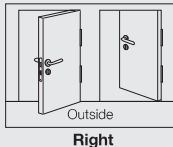

Model Number

Sub Code

- A: Lever Handle
- B: Lever Handle + 950 Escutcheon**
- C: Lever Handle + 957 Escutcheon
- D: Lever Handle + 951 Bathroom Set
- E: Lever Handle + 952 Bathroom Set

Outside
Left

Outside
Right

EX: 194 Door Knob (Single-side / Fixed)

194-HF

Model Number

Sub Code

- A: Door Knob (Pair / Operable)
- AF: Door Knob (Pair / Fixed)
- HF: Door Knob (Single-side / Fixed)**

Window Handle

To identify the shape of the handle rose, the article numbers have Sub Code after their Model Number.

EX: 214W Window Handle (Square Rose)

214W-S

Model Number

Sub Code

- O: Oval Rose
- S: Square Rose**

Pull Handle

For 9401 and 9402, there is Sub Code which indicates the handle length and whether the handle is a pair or single-side.

EX: 9402 Pull Handle (Single-side / 600 mm)

9402-600H

Model Number

Sub Code

- 300: Pull Handle (Pair / 300 mm)
- 300H: Pull Handle (Single-side / 300 mm)
- 600: Pull Handle (Pair / 600 mm)
- **600H: Pull Handle (Single-side / 600 mm)**
- 1000: Pull Handle (Pair / 1,000 mm)
- 1000H: Pull Handle (Single-side / 1,000 mm)

Other point

Some of the article numbers have Color Code after their Model Number.

EX: 30M Towel Rail (Silver Polish)

30M-SC

Model Number

Color Code

- GB: Gold Polish
- **SC: Silver Polish**

Things to note when ordering

- * Please specify the thickness of the door every time when ordering lever handles, door knobs, pull handles, pad handles, and sliding door lock sets (427L, 431L, 432L and 435L).
- * In cases where the lock case is not in the center of the door, note the position off-center.
- * Please arrange required anchors in cases where the provided screws cannot be used.
- * Unless otherwise agreed in writing, by submitting a sales order we assume that Buyer is agreeing to be bound by our Terms and Conditions.

Terms and Conditions

1. GENERAL

- a. Buyer must read these terms and conditions carefully before ordering any of our products, and by submitting a sales order, Buyer shall agree to be bound by these terms and conditions. Unless otherwise agreed in writing, all orders and quotations apply to these terms and conditions.
- b. These terms and conditions are always valid in their most recent form. Seller notifies Buyer in advance when updating this agreement.
- c. Communication between Buyer and Seller shall be in English or Japanese.
- d. Notices sent from Seller to Buyer shall be deemed to reach when on the rules below.
[Facsimile, e-mail]
At the time Seller has made the notice.
[Prepaid Postage, Registered Airmail]
10 days after posting.

2. QUOTATION, ORDER

- a. Quotation issued by a request of Buyer does not mean the acceptance of the order.
- b. Order must be given in writing. Verbal agreements are not effective.
- c. Order shall be effective when Buyer receives a written confirmation from Seller.
- d. Seller makes an effort to send order confirmation to Buyer within the next business day of the order reached. And also Seller may refuse the order. If the order confirmation will not reach to Buyer within 3 business days, confirm to Seller.
- e. Specification of product such as spindle size, door thickness shall be specified on the order.
- f. If Buyer will request an arrangement of delivery to Seller, delivery information (address, transport, insurance, etc.) shall be specified on the order or the request for quotation.
- g. Modification of the order shall be confirmed in writing by prior agreement.
- h. Order can be revoked if the written revocation reaches to Seller before Seller has dispatched a confirmation.
