人のためのかたち

ミラノ生まれのデザイナー、ルイジ・ヴェラーティ氏と協同し、
3つの有機的なフォルムと5つの鮮やかなカラーバリエーションを揃えた、
ポップかつヒューマンなデザインのレバーハンドルが誕生しました。

世界的な評価をいただいたブランド「Agaho」から20年。
ハンドル座を感じさせない美しいディテールを継承し、
WESTがたどり着いた「人のためのかたち」を、
どうぞその目で、そしてその手でお確かめください。

Lever handle that has reached a sculptural design but flashy.

- Luigi Velati

A handwritten signature in black ink, reading "Velati Luigi". The signature is written in a cursive, flowing style with a long horizontal stroke at the end.

UNICA

'Shaping for Human'

In collaboration with an Italian designer, Luigi Velati from Milan, three organic forms and five vivid colour variations with pop & human design of lever handles have been created. It has been 20 years since Agaho brand is globally awarded. However, its beautiful details have been inherited. Please take a look and touch our Concept of 'Shaping for Human' .

About Us

Company Name

WEST inx Ltd.

Headquarters

3-18-3 Shimeno, Neyagawa-city, Osaka
572-0077 Japan

Established

Oct. 1933

President

Yasuo Nishi

ISO

ISO9001 certified in 1998

Tokyo Showroom

Osaka Showroom

WEST has its origins in a factory named “Nishi Seisakusho”(Nishi's factory) founded in 1933 by Mr.Asajiro Nishi. He started with manufacturing of locks and ironmongery hardwares mainly for vessels at Mitejima, near Osaka sea port. About a few years later, the product range had shifted to the category of house building hardware due to the large demands of rapid economic growth.

In 1965, the factory was moved to Neyagawa City where has been a main artery between Kyoto and Osaka since ancient times. At that time, major locking system of sliding door was still screw-in type. Our development of the CL lock, which enables users to lock in a single action, was an epoch-making and brought a big boom in the hardware industry. Following that, we released the Automatic Sliding Door Closer as well as the Push-Pull Lever handle lock. As a result of these developments, WEST started to be known as a manufacturer that creates totally new, innovative and user-friendly products.

Throughout the 1970s and 80s, with highly increasing of housing demand, our product range was greatly widened in accordance with the needs of the market. To meet the market tough demand of quality, cost and lead time, we have been supplying only the best products up until today.

The end of the 1980s was at the peak of the growing Japanese economy in the era of gaudy and gorgeous things were preferred. On the other hand, however, WEST has dared to start a new project, because it was necessary to create a new product range with universality and true values in order to further enrich the spaces of daily life. We came to believe that the new product range must be useful and usable in a long term while attracting a strong attachment from its users. As a result, we have been through many continuous try and error, the first products in the Agaho series were created in 1992. The products that have followed the first Agaho items also embody fundamental ideas and most of them have received Good Design Awards (the Japanese comprehensive design evaluation and commendation) in 1992,2003 and 2008. Not only winning the awards in Japan, those products have received the Gold Prize at the iF Design award in Germany, 2008.

Our present corporate trademark was created a modified letter “W”. This shape was inspired by the tip of a Bit Key and shows the WEST identity. We are proud of manufacturing locks and cylinders not only for the domestic market but also for the international market. The most important requirement for manufacturing lock is reliability. Therefore, we believe that our WEST trademark is a guarantee of trust.

In 2010, “Nishi Seisakusho” (the manufacturing headquarters of WEST group) changed its company name to WEST inx Ltd. The word “inx” indicates the meaning of two words starting with “in” -“innovative” and “inspiring”

-that express our company ideals, and “x” shows that the two words are joined in mutual effect. This name originates in the desire of our company to continue creating unique innovative products, and also to have a presence that may help architects and designers to create inspiring living spaces. Moreover, the name implies our stance of cutting through the coming era and our will to revolutionize ourselves in order to match rapid changes in society.
